Greetings to all eMyPeople Clients,

Newsletter Contents

- **Billing Notices**
- **SafeSentryPro Mobile**
- **Dialup to Wireless Special Offer**
- **Support Tech Position available**

Billing Notices:

****PLEASE NOTE**:**

All billing correspondence should be sent to the following address:

Emypeople LLC
509 Frystown Road
Myerstown, PA 17067

Note: Equipment returns generally do not go to this address. Please request the correct address from support@emypeople.net.

Regarding account balances. Overdue payments will result in your services being disabled. Please watch for Billing notices in your email and also any paper statements that may come in the mail. If mailing a payment please make sure your payment arrives before the due date. Payment by credit (and most debit) cards are available for your convenience. We do thank you for your prompt payments!

SafeSentryPro Mobile: We are excited to announce a Beta program for SafeSentryPro-Mobile! This is our Mobile control project that we have been developing for some time. Modern Mobile devices often leave us feeling out of control and forced to accept whatever the device or the wireless Carrier includes. eMyPeople wants to start providing a proactive choice for Mobile that will help put you back in control.

Our first option is for the Apple iOS devices (yes, we are working on Android as well). Apple has the advantages of high quality devices and very consistent Operating System continuity between models. A disadvantage is the higher purchase cost. As we build on our successes more economical options will be researched.

Participation is limited for this initial phase and we are primarily interested in technical savvy individuals that can help us test the system. It will be necessary to purchase an Apple iPhone from eMyPeople, with costs starting around \$430. Monthly subscription starts at \$73.53 for comprehensive service, which includes Verizon 1GB Data, Unlimited calling and texting and SafeSentryPro Filtering. Email-Only will also be an option. There is no contract for the monthly service and it can be canceled at any time. Depending on overall response we may offer the option to activate the device on your carrier, although going that route has certain cautions that we will need to discuss with you.

If interested in this please reply with SafeSentryPro MOBILE BETA INFO in the subject line. We will forward you more information.

Dialup to Wireless Special Offer: For a limited time we are offering 30% off equipment** costs when purchasing wireless service. This offer is limited to those who have a current Dialup Subscription. If you have been thinking of upgrading from Dialup to a faster connection, don't wait any longer! This special is dependent on available supply and can end at any time.

** Does not apply to Enterprise Wireless equipment

Support Tech Position available: We are currently accepting applications for an entry-level Support Tech. Our goal is to allow our current techs more time to devote to development projects in progress. The job will require good phone skills and problem-solving abilities. General computer familiarity required. Computer repair experience a big plus. Your location can be virtually anywhere that you have a good Internet connection although locations in the US are preferred. Compensation corresponds to experience. Reply with your info attached.

Thanks for your attention!
Feel free to pass this letter on to other interested parties.

For the eMyPeople Team,
Brad Hochstetler
